## SUMMARY

Experienced software professional with **8 years** of expertise in **JavaScript** technologies, demonstrating a strong passion for advancing my software career. Committed to delivering cutting-edge solutions and constantly expanding my knowledge to stay at the forefront of the industry.

## EXPERIENCE

### Senior Software Engineer

#### Klarna

📅 Dec. 2021 - PRESENT 📍 Giessen, Germany

- Lead development efforts for a cross-platform mobile application using **React Native**, **TypeScript**, and **Node.js**, implementing backend driven frontend approach.
- Utilize **Datadog** dashboard for monitoring and optimizing application performance.
- Implement event tracking and analysis using **Amplitude** for data-driven decision-making.
- Mentor junior engineers, conduct code reviews, and promote best practices for code quality and testing.

### Associate

#### MSCI Inc.

📅 Sep. 2020 - Nov. 2021 📍 Pune, India

- Developed front-end applications in collaboration with Microsoft using **React/TypeScript** for the finance domain.
- Built and deployed highly available and auto-scalable service infrastructure using **Docker** containers and **Microsoft Azure** Services.
- Integrated Microsoft **Power BI** reports for effective visualization of business-related data.

### Senior Software Engineer

#### Calsoft Inc.

📅 July 2019 - Sept 2020 📍 Pune, India

- Developed client-specific front-end applications using **Vue**.
- Created an intuitive hardware booking tool with availability tracking for developers.
- Played a key role in team and organizational enhancements in process and infrastructure.

### Senior Software Engineer

#### Winjit Technologies Pvt Ltd.

📅 Dec. 2017 - Jun. 2019 📍 Nashik, India

- Developed customer-facing UI and back-end services using **Node.js**, **Python**, and **JavaScript**, ensuring high performance and scalability.
- Made significant contributions to code architecture decisions, resulting in a robust and reusable codebase for future use.

## SKILLS

JavaScript React Redux Vue  
Node.js TypeScript Express Git  
Electron Docker Databases Jest  
Agile HTML CSS Azure AWS

## PROJECTS

### Spending Limit

- Implemented backend driven frontend approach for rendering the spending limit widget on the client app.
- Developed main dashboard for managing the spending limit widget, including various states and rejections.
- Collaborated with product team to build UI based on Figma designs and integrated APIs for real-time updates.

### Climate Lab Portal

- Contributed to the development of the Climate Lab Portal, providing corporate and institutional investors with transparency into climate-related risks and opportunities.
- Played a key role in understanding business requirements and developing a customer-facing UI using **React/TypeScript**.

### Hardware Booking Manager

- Designed and developed an intuitive hardware booking manager tool, streamlining the process and enabling easy access to resources.
- Implemented hardware availability tracking feature for efficient resource management and improved productivity.

### Property Management Software

- Implemented reusable UI components using **Material-UI** for the BuildingLink web application, enhancing the user interface and overall user experience.
- Developed a comprehensive property management software solution, empowering property managers to streamline operations and optimize efficiency.

## EDUCATION

### Bachelor of Engineering

#### SINHGAD COLLEGE OF ENGINEERING

📅 May. 2011 - Jun. 2015
